No. 04-15

Production levels resume in Gabon

Maurel & Prom Gabon took measures to temporarily limit its production to permit smooth technical intervention on the pipeline linking Coucal to Cap Lopez. This work was carried out by Total Gabon, the pipeline operator, with the consent and support of the various users to speed the resumption of exports.

Estimated average production for the month of January is 14,700 bopd at 100%.

Production level is now back to approximately 25,000 bopd.

This document may contain forward-looking statements regarding the financial position, results, business and industrial strategy of Maurel & Prom. By nature, forward-looking statements contain risks and uncertainties to the extent that they are based on events or circumstances that may or may not happen in the future. These projections are based on assumptions we believe to be reasonable, but which may prove to be incorrect and which depend on a number of risk factors, such as fluctuations in crude oil prices, changes in exchange rates, uncertainties related to the valuation of our oil reserves, actual rates of oil production and the related costs, operational problems, political stability, legislative or regulatory reforms, or even wars, terrorism and sabotage.

Maurel & Prom is listed for trading on Euronext Paris – Compartment A
